Glasgow Caledonian University is delighted to offer a fully funded residential programme at GCU's Cyber Camp from June 17 to June 19 for school pupils aged 16 - 18 from S4 and S5 at the University's city-centre campus.

GCU Cyber Camp

June 18 to June 20 2024 | Closing date: 1 May 2024

Glasgow Caledonian University is delighted to offer a fully funded residential programme at GCU's Cyber Camp from June 17 to June 19 for school pupils aged 16 - 18 from S4 and S5 at the University's city-centre campus.

Hosted by the University's Department of Cyber Security and Networks at the School of Computing, Engineering and Built Environment, it aims to develop the pupils' skills and to encourage them to consider studying cyber security and to think about pursuing a career in this field.

The event will focus on hands-on activities and they'll work in teams of three or four and be presented with a real-life problem they have to solve. They'll have workshops in general digital skills as well as in digital forensics, ethical hacking and programming and develop other skills including communication. Pupils will be supervised throughout and will also have evening social activities.

The residential element is central to their experience and all participants are expected to stay within the University accommodation during the programme. They'll stay at the University's on-campus residences in individual rooms with en-suite, sharing a flat of six to eight rooms and will be separated by gender.

The fully funded places for GCU's Cyber Camp are made possible thanks to the School of Computing, Engineering and Built Environment's generous industry prize sponsors. Funding will fully cover tuition costs, accommodation, all meals and organised activities. Please inform us of any dietary requirements when applying.

Note: This camp is not suitable for pupils studying the NPA Cyber Security at Level 5 or 6.
